

In Scena! Italian Theater Festival NY 2015

Theater & Film

The best of Italian theater comes to NYC for the month of May with performances, readings, and special events.

The Italian Theater Festival aims to bring Italian theater to New York and build a bridge between the theater scene in the United States and Italy. With performances in all boroughs in a variety of different languages and genre, there is something for everyone to enjoy. For non-English performances, there will be supertitles.

Along with full plays and readings, the festival includes special events including panel discussions such as: *Be International: Producing International Theater in NY*, as well as cultural exchange performances like *Free Verse Meets In Scena!*, a collaboration with Italian artists in the South Bronx Community.

Ticket prices vary, and some performances are free. See the Italian Theater Festival's [website](#) for more information.
